# TECHNOLOGY

## NEVERFLAT

The Spalding Neverflat basketball holds air longer than traditional basketballs resulting in consistent rebound height.

- Exclusive patented NitroFlate® Technology
- Special valve prevents air seepage
- Excellent grip and ball control

[See page 15, 19]

## 3ON3

Size 6 ball, but weight of a size 7 ball

[See page 41]

## COLOR INFUSED

Colored rubber with a unique color mixing technique that makes each ball different from the next.

[See page 43]

## SOFT GRIP TECHNOLOGY

The two layer sponge rubber design gives a soft grip, perfect game characteristics and a very long durability in category of outdoor balls.

[See page 19]

## ROOKIE GEAR TECHNOLOGY

Spalding Rookie Gear provides a lighter ball, for a better experience. Spalding Rookie Gear is designed to weigh less than standard youth balls for kids under 8 years. A lighter ball creates a better experience for kids, allowing them to practice proper fundamentals more easily and build the confidence they need with a ball that is appropriate in size and weight. Watch as your young athlete learns faster and performs better than ever before.

Weighs 15% lighter than traditional balls

[See page 17]

## MOLDED BASKETBALL CONSTRUCTION

A type of basketball where the entire outer surface is produced together with the molding of the carcass. This technique is used with our outdoor basketballs.

**CARCASS and COVER** Provides structure for the inner components. With high-end rubber balls, a coat of paint is applied to enhance a better grip and look.

## LAMINATED BASKETBALL CONSTRUCTION

A type of basketball where panels of leather, composite leather or synthetics are fixed onto a rubber carcass by hand. This technique is used for our indoor and indoor/outdoor basketballs.

**COVER** provides good grip, feel and aesthetic appeal to the ball as well as necessary strength and abrasion resistance.

**CARCASS** provides structure for the inner components.

## LEGACY

ZK Material: This exclusive material with advanced moisture management control is engineered for high caliber indoor play. The soft carcass and deep channel design gives this ball a softer feel and improved grip.

The **COVER** material provides superior grip and soft feel while maintaining Spalding's rigorous standards for material strength and abrasion resistance.

The **CARCASS** provides structure, shape and protection for the inner components.

### WINDINGS

Nylon windings add structural integrity and durability to the ball.

### BLADDER

High-end butyl bladder that maintains air pressure.
